

AMENDMENTS TO THE SPECIFICATION

On page 1, please add the following subtitles and paragraph after the title and before paragraph [0001] of the invention:

CROSS-REFERENCE TO RELATED APPLICATIONS

[000.1] This application is a continuation of PCT/EP02/03629, filed April 2, 2002 which claims priority to DE 101 15 890.4, filed March 30, 2001, both of which are incorporated by reference herein.

BACKGROUND AND SUMMARY OF THE INVENTION

On page 2, please add the following subtitle before paragraph [0006]:

BRIEF DESCRIPTION OF THE DRAWINGS

On page 3, please add the following subtitle before paragraph [0010]:

DETAILED DESCRIPTION

Please add the Abstract Section of the specification as follows:

ABSTRACT

The available fabric mass in the one-piece woven airbag as tailorized by the method, now makes it possible to reinforce the airbag fabric individually oriented. Thus, at a high stress location formerly exhibiting airbag tears, a fabric quality is now available of enhanced resistance, achieved among other things by an increase in the thermal

capacity in the neuralgic locations of the airbag where namely the jet lances feature their so-called jet gill zone.

Applicants respectfully request the Examiner to pass this application to issuance at his earliest convenience.

Respectfully submitted,

By:
